

ABSTRACT OF THE DISCLOSURE**CALLER-INITIATED TRANSFER OF SERVICES BETWEEN TELEPHONES**

A method, computer program product, and data processing system for transferring mobile telephone minutes or other mobile telephone services or features from one customer to another is disclosed. A customer dials into an interactive service that allows the customer to specify one or more recipients and a number of minutes, services, or features to transfer. A data processing system associated with the customer's mobile telephone service provider effects a transfer of minutes, services, or features from the customer's account to the recipients' accounts. In addition, a notification that the transfer has occurred can be sent to the recipients.
